

**Supplemental Data III**  
**Examples of student text and coding system for free responses to questionnaire**

<b>Student text:</b>	<b>Codes and explanatory sub-codes:</b>
1. I actually ended up liking working in <u>groups</u> although in the beginning I hated it. It really <u>facilitated learning</u> .	code: groups subcodes: facilitated learning
2. <u>Quizzes</u> helped keep the material fresh in my mind every week and gave me a reason to <u>review even without an exam</u> coming up. They <u>helped me learn</u> the material.	code: quizzes subcodes: reviewed, helped me learn
3. <u>Lectures</u> went very <u>slowly</u> and seemed to <u>drag on</u> . The same amount of material could have been learned in a 50 min. lecture instead. Shorter lecture might keep me from <u>loosing interest in the material</u> .	code: lecture not stimulating subcodes: too long, too slow
