Supplementary Table 1. Comparison of work-life balance survey responses of four cohorts

Supplementary Table 1. Comparison of work-life balance survey responses of four cohorts								
Number of participants in each cohort								
Cohort	I	II	III	IV				
Men	11	9	20	12				
Women	8	15	14	13				
Q1 Will I still be able to meet my future spouse/partner? Q2 Will my spouse/partner and I be able to find jobs in the same location? Q3 Will my career be set back as I take time for maternity/paternity leave? Q4 As I work at my career, will I have time to spend with my child/children								
	Before panel discussion				After panel discussion			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
Men								
H ^a	0.7820	2.5900	1.3970	1.7050	1.9620	3.4740	4.1920	3.9360
P ^b	>0.05	>0.05	>0.05	>0.05	>0.05	>0.05	>0.05	>0.05
Women								
H	2.1280	1.2440	0.7560	1.7300	0.5771	3.1030	2.2690	2.0130
P	>0.05	>0.05	>0.05	>0.05	>0.05	>0.05	>0.05	>0.05
^a H statistic from the Kruskal-Wallis test (3 degrees of freedom) ^b Medians among cohorts are not significantly different when H < 7
