## Supplemental Material

CBE-Life Sciences Education
Durham et al. choices for each question.

| Out-of-Class Activites |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 9 | 21 | Out-of-class assignments are any required exercise, activity, or project completed outside of class time, other than reading a textbook or watching a video. Out-of-class assignnments include worksheets, problem sets, case studies, online learning tools, inquiry-based activities, low point value quizzes, discussion boards, and other related activites. <br> Students were asked to complete out-of-class assignments approximately: | zero times | up to 1 assignment per month | $\begin{gathered} \hline 2-3 \\ \text { assignments } \\ \text { per month } \end{gathered}$ | 1 assignment per week | 2-3 assignments per week | $\begin{gathered} 4-5 \\ \text { assignments } \\ \text { per week } \end{gathered}$ | more than 5 assignments per week |
| 10 | 2 | If a YES option to \#2 and \#9 ONLY: Indicate the approximate percent of out-of-class assignments that overlapped with the learning goals provided by the instructor: |  |  |  | slider bar 0-100\% |  |  |  |
| 11 | 21 | If a YES option to \#9 ONLY: Indicate the approximate percent of out-of-class assignments for which students were given some form of general or individualized feedback beyond simply providing correct or incorrect answers: |  |  |  | slider bar 0-100\% |  |  |  |
| Summative Assessment |  |  |  |  |  |  |  |  |  |
| 12 | 3 | Students were asked to complete major exams or term projects, including final exams approximately: | zero times | 1 time during the semester | 2 times during the semester | 3 times during the semester | 4 times during the semester | 5 times during the semester | 6 or more times during the semester |
| 13 | 3 | If a YES option to \#2 and \#12 ONLY: Indicate the approximate percent of questions or components on major exams or term projects that overlapped with the learning goals provided by the instructor: |  |  |  | slider bar 0-100\% |  |  |  |
| 14 | 21 | If a YES option to \#12 ONLY: Indicate the approximate percent of questions or components on major exams or term projects for which students were given some form of general or individualized feedback beyond simply providing correct or incorrect answers: |  |  |  | slider bar 0-100\% |  |  |  |
| Student-Student Interactions |  |  |  |  |  |  |  |  |  |
| 15 | 22 | Students were asked to work in groups of two or more for any portion of this course: If "no" is selected, skips to \#22 | yes | no |  |  |  |  |  |
| 16 | 22 | Indicate the average percent of class time during which students were asked to work in groups of two or more: | slider bar 0-100\% |  |  |  |  |  |  |
| 17 | 22 | [In-class activities definition reappears here] <br> Students were asked to work in groups of two or more on in-class activities, discussions, assignments, or projects other than polling questions approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{gathered} \text { 2-3 times per } \\ \text { month } \end{gathered}$ | 1-2 times per week | 3-4 times per week |  |
| 18 | 22 | [Out-of-class activities definition reappears here] <br> Students were asked or encouraged to work in groups of two or more on out-of-class activities, assignments, or projects approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | 1-2 times per week | $\begin{aligned} & \text { 3-4 times per } \\ & \text { week } \end{aligned}$ | more than 4 <br> times per week |
| 19 | 30 | (Instructor version only) <br> Diversity includes differences in race, ethnicity, culture, background, religion, affiliation, age, gender, orientation, course performance, personality type, etc. <br> Students were grouped using a strategy that considers the diversity of each group: | yes | no |  |  |  |  |  |
| 20 | 24 | The instructor used a strategy, such as assigning roles, to promote the participation of each group member during in-class group activities: | not at all | rarely | less than half of the time | half of the time | more than half of the time | almost always | always |
| 21 | 26 | At least some students were asked to verbally share the results of any group work or group discussions with the whole class approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline 2-3 \text { times per } \\ \text { month } \end{array}$ | 1-2 times per week | $\begin{aligned} & \text { 3-4 times per } \\ & \text { week } \end{aligned}$ | more than 4 <br> times per week |
| 22 | 23 | Students were asked to comment or make suggestions on each other's work on class assignments, activities, or projects approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | 1-2 times per week | 3-4 times per week | $\begin{gathered} \hline \text { more than } 4 \\ \text { times per week } \end{gathered}$ |

| Inclusivity |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 23 | 27 | To what extent do you agree with the following statement: <br> Students were encouraged to respond to classmates' ideas during whole-class discussions: | this course did not include whole class discussions | strongly disagree | disagree | somewhat disagree | somewhat agree | agree | strongly agree |
| 24 | 29 | Diversity includes differences in race, ethnicity, culture, background, religion, affiliation, age, gender, orientation, course performance, personality type, etc. <br> Examples or analogies used in this course included a diversity of people and cultures. | humans were not discussed in this course | strongly disagree | disagree | somewhat disagree | somewhat agree | agree | strongly agree |
| 25 | 28 | Diversity includes differences in race, ethnicity, culture, background, religion, affiliation, age, gender, orientation, course performance, personality type, etc. <br> Students were encouraged to consider the ideas and contributions of a diversity of researchers and other people involved in science. | humans were not discussed in this course | strongly disagree | disagree | somewhat disagree | somewhat agree | agree | strongly agree |
| 26 | 31 | The instructor was sensitive to socially controversial issues. | X | strongly disagree | disagree | somewhat disagree | somewhat agree | agree | strongly agree |
| Student Influence on Course Structure |  |  |  |  |  |  |  |  |  |
| 27 | 5 | Students were asked to provide formal or informal feedback on course activities and content prior to the end of the semester evaluation. | zero times | 1 time during the semester | 2 times during the semester | 3 times during-the semester | 4 times during the semester | 5 times during the semester | $\begin{array}{\|c} 6 \text { or more times } \\ \text { during the } \\ \text { semester } \end{array}$ |
| 28 | 5 | If a YES option to \#27 ONLY: Student feedback on course activities and content was used to make adjustments to the course within the semester: | none of the time | some of the time that feedback was collected | every time that feedback was collected |  |  |  |  |
| 29 | 6 | Students stated interests or asked questions related to the topic at hand during class: | X | strongly disagree | disagree | somewhat disagree | somewhat agree | agree | strongly agree |
| 30 | 7 | The instructor was generally aware of instances when a concept was not understood by the majority of students in the class prior to an exam: | not at all | rarely | less than half of the time | half of the time | more than half of the time | most of the time | always |
| 31 | 7 | When it became clear that the class did not understand a concept, students were provided with followup discussion, activities, or resources. | not part of this course | rarely | less than half of the time | half of the time | more than half of the time | most of the time | always |
| Student Participation \& Science Practices |  |  |  |  |  |  |  |  |  |
| 32 | 11 | Students were asked to identify or formulate hypotheses or make predictions about the results of demonstrations, experiments, or examples approximately: | zero times | 1-2 times during the semester | about 1 time per month | 2-3 times per month | 1-2 times per week | 3-4 times per week | $\begin{array}{c\|} \hline \text { more than } 4 \\ \text { times per week } \end{array}$ |
| 33 | 11,12 | Students were asked to critique scientific hypotheses or experimental strategies approximately: | zero times | 1-2 times during the semester | about 1 time per month | 2-3 times per month | $\begin{array}{\|c\|} \hline 1-2 \text { times per } \\ \text { week } \end{array}$ | 3-4 times per week | more than 4 <br> times per week |
| 34 | 12 | Students were asked to design experiments to answer scientific questions approximately: | zero times | 1-2 times during the semester | about 1 time per month | 2-3 times per month | $\begin{array}{\|c} \hline 1-2 \text { times per } \\ \text { week } \end{array}$ | 3-4 times per week | $\begin{array}{\|c\|} \hline \text { more than } 4 \\ \text { times per week } \end{array}$ |
| 35 | 13 | Students were asked to summarize, interpret, or analyze data using mathematical or computational procedures approximately: | zero times | 1-2 times during the semester | about 1 time per month | 2-3 times per month | 1-2 times per week | $\begin{array}{\|c} \hline \text { 3-4 times per } \\ \text { week } \end{array}$ | $\begin{array}{\|c\|} \hline \text { more than } 4 \\ \text { times per week } \end{array}$ |
| 36 | 14 | Students were asked to make graphs or tables approximately: | zero times | 1-2 times during the semester | about 1 time per month | 2-3 times per month | $\begin{array}{\|c\|} \hline 1-2 \text { times per } \\ \text { week } \end{array}$ | $\begin{array}{\|c} \hline 3-4 \text { times per } \\ \text { week } \end{array}$ | $\begin{array}{\|c\|} \hline \text { more than } 4 \\ \text { times per week } \end{array}$ |

| Student Participation \& Science Practices (continued) |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 37 | 14 | Students were asked to analyze or interpret scientific data shown in graphs or tables approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c} 2-3 \text { times per } \\ \text { month } \end{array}$ | 1-2 times per week | 3-4 times per week | $\begin{gathered} \text { more than } 4 \\ \text { times per week } \end{gathered}$ |
| 38 | 16, 17 | Students were asked to use data to make decisions or defend scientific conclusions approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | 1-2 times per week | 3-4 times per week | more than 4 times per week |
| 39 | 15 | Models are tools used to summarize a scientific process, including drawing pathways, diagrams, schematics, concept maps, flow charts, "road maps", tables, illustrative models, box-and-arrow diagrams, etc. <br> Students were asked to make or interpret models to summarize scientific processes approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | $\begin{array}{\|c} \hline 1-2 \text { times per } \\ \text { week } \end{array}$ | 3-4 times per week | $\begin{array}{\|c\|} \hline \text { more than } 4 \\ \text { times per week } \end{array}$ |
| 40 | 18 | Students were asked to interpret or critique scientific literature or media articles related to science approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | 1-2 times per week | $\begin{gathered} \text { 3-4 times per } \\ \text { week } \end{gathered}$ | more than 4 times per week |
| 41 | 19 | Students were asked to communicate scientific ideas in formal written papers or oral presentations approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | 1-2 times per week | $\begin{array}{\|c} \hline 3-4 \text { times per } \\ \text { week } \end{array}$ | more than 4 <br> times per week |
| 42 | 9 | Students were provided with examples or explanations showing that course concepts are applicable to everyday human experiences or real-life applications approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | 1-2 times per week | $\begin{array}{\|c} \hline \text { 3-4 times per } \\ \text { week } \end{array}$ | more than 4 <br> times per week |
| 43 | 8 | Historical context was used to recognize why certain discoveries or advancements changed the way people viewed related scientific principles approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | 1-2 times per week | 3-4 times per week |  |
| Student Cognitive Engagement |  |  |  |  |  |  |  |  |  |
| 44 | 33 | Students were asked to interpret or represent concepts in non-written formats, such as pictures, diagrams, videos, simulations, role-plays, graphs, mathematical models, etc. approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{gathered} \text { 2-3 times per } \\ \text { month } \end{gathered}$ | 1-2 times per week | 3-4 times per week |  |
| 45 | 35 | Students were asked to practice knowledge or skills from other Science, Technology, Engineering, and Math (STEM) subjects when answering questions or completing class approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | 1-2 times per week | $\begin{array}{\|c} \hline \text { 3-4 times per } \\ \text { week } \end{array}$ | more than 4 times per week |
| 46 | 32 | Students engaged in higher level thought processes that required them to apply, analyze, incorporate, or evaluate their knowledge or skills rather than just memorizing facts or processes approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | 1-2 times per week | $\begin{array}{\|c} \hline 3-4 \text { times per } \\ \text { week } \end{array}$ | more than 4 <br> times per week |
| 47 | 34 | Students were asked to participate in open-ended exercises, such as case-studies or questions in which multiple correct answers are possible approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | 1-2 times per week | $\begin{array}{\|c} \hline 3-4 \text { times per } \\ \text { week } \end{array}$ | more than 4 <br> times per week |
| 48 | 37 | Students were provided with opportunities or suggestions to reflect on whether their study habits were effective for learning approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | 1-2 times per week | 3-4 times per week | $\begin{array}{\|c\|} \hline \text { more than } 4 \\ \text { times per week } \end{array}$ |
| 49 | 36 | Students were provided with opportunities or suggestions to reflect on their problem-solving strategies approximately: | zero times | 1-2 times during the semester | about 1 time per month | $\begin{array}{\|c\|} \hline \text { 2-3 times per } \\ \text { month } \end{array}$ | 1-2 times per week | 3-4 times per week |  |

|  |  | EFA-derived factors |  |  |  |  |  |  |

Supplemental Material 3. Mean normalized scores for individual MIST items. Bars represent the mean of all individual normalized student responses for each MIST item $\pm$ SE. $n=7767$ students.

Supplemental Material 6. Summary of MIST questions in handout form.

|  |  |  |  |
| :---: | :---: | :---: | :---: |
| Q \# | MSC ${ }^{1}$ | MIST question | Instructor Response: |
| Learning Goals \& Alignment |  |  |  |
| 1 | ALS | Indicate the average percent of class time during which students were asked to answer questions, solve problems, or complete activities other than listening to a lecture: | 0-100\% |
| 2 | LGF | Learning goals ${ }^{2}$ were provided for: | select all: 7-pt frequency |
| Clickers |  |  |  |
| 3 | ALS | Students were asked to use a polling method ${ }^{2}$ to answer questions in the classroom approximately: | 7-pt frequency |
| 4 | LGF | Indicate the approximate percent of polling questions that overlapped with the learning goals provided by the instructor: | 0-100\% |
| 5 | ALS | Indicate the approximate percent of polling questions for which students were asked to discuss the question in pairs or small groups: | 0-100\% |
| In-Class Activites |  |  |  |
| 6 | ALS | Students were asked to complete in-class activities ${ }^{2}$ approximately: | 7-pt frequency |
| 7 | LGF | Indicate the approximate percent of in-class activities that overlapped with the learning goals provided by the instructor: | 0-100\% |
| 8 | LGV | Indicate the approximate percent of in-class activities for which students were given some form of general or individualized feedback during class beyond simply providing correct or incorrect answers: | 0-100\% |
| Out-of-Class Activites |  |  |  |
| 9 | ALS | Students were asked to complete out-of-class assignments ${ }^{2}$ approximately: | 7-pt frequency |
| 10 | LGV | Indicate the approximate percent of out-of-class assignments that overlapped with the learning goals provided by the instructor: | 0-100\% |
| 11 | LGV | Indicate the approximate percent of out-of-class assignments for which students were given some form of general or individualized feedback beyond simply providing correct or incorrect answers: | 0-100\% |
| Summative Assessment |  |  |  |
| 12 | none | Students were asked to complete major exams or term projects, including final exams approximately: | 7-pt frequency |
| 13 | LGV | Indicate the approximate percent of questions or components on major exams or term projects that overlapped with the learning goals provided by the instructor: | 0-100\% |
| 14 | LGV | Indicate the approximate percent of questions or components on major exams or term projects for which students were given some form of general or individualized feedback beyond simply providing correct or incorrect answers: | 0-100\% |
| Student-Student Interactions |  |  |  |
| 15 | none | Students were asked to work in groups of two or more for any portion of this course: | no/yes |
| 16 | ALS | Indicate the average percent of class time during which students were asked to work in groups of two or more: | 0-100\% |
| 17 | ALS | Students were asked to work in groups of two or more on in-class activities, discussions, assignments, or projects other than polling questions approximately: | 7-pt frequency |
| 18 | ALS | Students were asked or encouraged to work in groups of two or more on out-of-class activities, assignments, or projects approximately: | 7-pt frequency |
| 19 | none | (Instructor version only) <br> Students were grouped using a strategy that considers the diversity ${ }^{2}$ of each group: | no/yes |
| 20 | ALS | The instructor used a strategy, such as assigning roles, to promote the participation of each group member during in-class group activities: | 7-pt frequency |
| 21 | ALS | At least some students were asked to verbally share the results of any group work or group discussions with the whole class approximately: | 7-pt frequency |
| 22 | ALS | Students were asked to comment or make suggestions on each other's work on class assignments, activities, or projects approximately: | 7-pt frequency |

| Inclusivity |  |  |  |
| :---: | :---: | :---: | :---: |
| 23 | ALS | Students were encouraged to respond to classmates' ideas during whole-class discussions: | 6-pt disagree/agree + n/a |
| 24 | Inc | Examples or analogies used in this course included a diversity ${ }^{2}$ of people and cultures. | 6-pt disagree/agree + n/a |
| 25 | Inc | Students were encouraged to consider the ideas and contributions of a diversity ${ }^{2}$ of researchers and other people involved in science. | 6-pt disagree/agree + n/a |
| 26 | Inc | The instructor was sensitive to socially controversial issues. | 6-pt disagree/agree |
| Student Influence on Course Structure |  |  |  |
| 27 | CSR | Students were asked to provide formal or informal feedback on course activities and content prior to the end of the semester evaluation. | 7-pt frequency |
| 28 | CSR | Student feedback on course activities and content was used to make adjustments to the course within the semester: | 3-pt frequency |
| 29 | RtS | Students stated interests or asked questions related to the topic at hand during class: | 6-pt disagree/agree |
| 30 | RtS | The instructor was generally aware of instances when a concept was not understood by the majority of students in the class prior to an exam: | 6-pt disagree/agree + n/a |
| 31 | RtS | When it became clear that the class did not understand a concept, students were provided with follow-up discussion, activities, or resources. | 6-pt disagree/agree + n/a |
| Student Participation \& Science Practices |  |  |  |
| 32 | EDC | Students were asked to identify or formulate hypotheses or make predictions about the results of demonstrations, experiments, or examples approximately: | 7-pt frequency |
| 33 | EDC | Students were asked to critique scientific hypotheses or experimental strategies approximately: | 7-pt frequency |
| 34 | EDC | Students were asked to design experiments to answer scientific questions approximately: | 7-pt frequency |
| 35 | DAI | Students were asked to summarize, interpret, or analyze data using mathematical or computational procedures approximately: | 7-pt frequency |
| 36 | DAI | Students were asked to make graphs or tables approximately: | 7-pt frequency |
| 37 | DAI | Students were asked to analyze or interpret scientific data shown in graphs or tables approximately: | 7-pt frequency |
| 38 | DAI | Students were asked to use data to make decisions or defend scientific conclusions approximately: | 7-pt frequency |
| 39 | DAI | Students were asked to make or interpret models ${ }^{2}$ to summarize scientific processes approximately: | 7-pt frequency |
| 40 | EDC | Students were asked to interpret or critique scientific literature or media articles related to science approximately: | 7-pt frequency |
| 41 | EDC | Students were asked to communicate scientific ideas in formal written papers or oral presentations approximately: | 7-pt frequency |
| 42 | RtS | Students were provided with examples or explanations showing that course concepts are applicable to everyday human experiences or real-life applications approximately: | 7-pt frequency |
| 43 | none | Historical context was used to recognize why certain discoveries or advancements changed the way people viewed related scientific principles approximately: | 7-pt frequency |
| Student Cognitive Engagement |  |  |  |
| 44 | CS | Students were asked to interpret or represent concepts in non-written formats, such as pictures, diagrams, videos, simulations, role-plays, graphs, mathematical models, etc. approximately: | 7-pt frequency |
| 45 | CS | Students were asked to practice knowledge or skills from other Science, Technology, Engineering, and Math (STEM) subjects when answering questions or completing class activities approximately: | 7-pt frequency |
| 46 | CS | Students engaged in higher level thought processes that required them to apply, analyze, incorporate, or evaluate their knowledge or skills rather than just memorizing facts or processes approximately: | 7-pt frequency |
| 47 | CS | Students were asked to participate in open-ended exercises, such as case-studies or questions in which multiple correct answers are possible approximately: | 7-pt frequency |
| 48 | CSR | Students were provided with opportunities or suggestions to reflect on whether their study habits were effective for learning approximately: | 7-pt frequency |
| 49 | CSR | Students were provided with opportunities or suggestions to reflect on their problem-solving strategies approximately: | 7-pt frequency |

${ }^{1}$ MIST subcategory abbreviations: ALS: Active Learning Strategies, LGF: Learning Goal Use and Feedback, Inc: Inclusivity,RtS: Responsiveness to Students, EDC: Experimental Design and Communication, DAI: Data Analysis and Interpretation, CS: Cognitive Skills, CSR: Course and Self Reflection
${ }^{2}$ These terms are defined in the survey, and definitions can be found in Supplemental Material 1.
