FEATURES

- **Approaches to Biology Teaching and Learning: Lesson Study—Building Communities of Learning Among Educators**
by Deborah Allen, Richard Donham and Kimberly Tanner
- **WWW.Cell Biology Education**
by Robert Blystone
- **Review of: PLoS Biology**
A Freely Available, Open Access Online Journal
by Todd Eckdahl
- **Review of: *Introduction to Biotechnology*** by William J. Thieman and Michael A. Palladino
Biology for the Utilitarian
by Tom D. Wolkow
- **Reviews of:**
Stem Cells and Cloning by David A. Prentice, Benjamin Cummings
Cells and the Future of Regenerative Medicine by National Research Council, Institute of Medicine
Stem Cells: Scientific Progress and Future Research Directions by Department of Health and Human Services
Human Embryonic Stem Cells by Ann A. Kiessling, and Scott Anderson
A Shelf of Stem Cells
by Rachel Fink
- **Points of View:**

Supported in part by an Undergraduate Science Education Program grant from the Howard Hughes Medical Institute

Should Students Be Encouraged To Publish Their Research in Student-Run Publications?

by Scott F. Gilbert, John R. Jungck, Margaret Harris, Renee Mercuri, Joshua Tusin, and Vivian Siegel

ESSAY

- **Meeting the Challenge of Science Literacy: Project 2061 Efforts To Improve Science Education**

by Mary Koppal and Ann Caldwell

ARTICLES

- **Characterization of Pathogenic Human MSH2 Missense Mutations Using Yeast as a Model System: A Laboratory Course in Molecular Biology**
by Alison E. Gammie and Naz Erdeniz
- **Just-in-Time Teaching in Biology: Creating an Active Learner Classroom Using the Internet**
by Kathleen A. Marrs and Gregor Novak
- **Mystery of the Toxic Flea Dip: An Interactive Approach to Teaching Aerobic Cellular Respiration**
by A. T. Baines, M. McVey, B. Rybarczyk, J. T. Thompson, and H. R. Wilkins

FEATURES

- **From the National Academies**
by Jay B. Labov

ANNOUNCEMENTS

September 3–7, 2005, Sydney, Australia
**15th International Society of
Developmental Biologists Congress**

Davidson College undergraduate students and faculty celebrate student research with an annual research symposium in early May. Students who have conducted research in biology, chemistry, mathematics, physics and psychology share their findings via poster presentations. In 2003, 94 students and 18 faculty members presented 85 posters with students, staff and faculty from across the campus in attendance.
