On the Cover [\[Printable Cover\]](#)

The cover highlights this issue's Feature which addresses the impact of the Brown v. Board of Education decision fifty years ago. The background image shows diverse

participants at a Minority Affairs Committee's session at the ASCB annual meeting. The three photos down the right side personalize research programs which foster minority participation in biology. From top to bottom: Nydia Brooks conducting research at Fisk University (top), Samuel Mbugua (middle) and Rosemary Flores (bottom) performed research at the University of Delaware. At the University of Delaware, grants from NIH, NSF and HHMI provide support to approximately 120 students who spend the summer conducting research; currently about half of these are minority students.
